

The First Sustainable Hand Surgery Table

Product Documentation
July 2020

Product Description

HandStand™ is the first sustainable hand surgery table for general and micro-surgical procedures of the wrist, hand, and fingers. Made of stainless steel, the device provides a cost-effective alternative to existing single-use hand operating tables, enabling hospitals to maximize clinical and financial outcomes.

Clinical & Financial Benefits

Optimize Patient Positioning & Operative-Site Access

Clinical outcomes matter most, why we engineered our device with physician and patient satisfaction in mind. With a flexible, accommodating, and ergonomic design, HandStand™ enables physicians to optimize patient positioning, operative-site access, and comfort for every procedure.

Improve ROI

As a durable device, HandStand™ enables hospitals to maximize their ROI and profitability by investing in a fixed-cost surgical system that never needs to be replaced.

Leverage One Fixed Cost

Most medical manufacturers avoid making sustainable products to create consistent demand and repeat customers. We subscribe to a different belief, one that values your business and bottom line.

Clinical & Financial Benefits (Cont.)

Eliminate Purchasing & Inventory Management

With only one purchase needed, HandStand™ affords hospitals the freedom to concentrate on other priorities without worrying about ordering new supplies or managing inventory.

Design Features

Design Overview

- Made of 100% stainless steel for durable, long-term use
- Innovative design for hand procedures--general and micro-surgical
- Adjustable top for unobstructed access to the operative site
- Designed to accommodate full range of accessory components, including wrist straps, retractors, and ties

Design Features

Exterior Fasteners

- Thirty (30) exterior fasteners surround table top for securing surgical accessories such as ties

Steel Ball Joint

- Steel ball joint enables full range of movement for comfort, support, and access to operative site

Adjustable Handle

- Adjustment handle offers a fast and convenient method for positioning and securing table top
